

DBL bore gages are designed to be lightweight, versatile, accurate, and are ideal for toolroom and production applications. The DBL series bore gages feature two point gaging and three point centralization. The gaging contacts are diametrically opposed, providing the most accurate reading of the bore. The reference contact accepts various length range extensions and adapters to change the measuring size of the gage without the loss of accuracy or balance. The independent external centralizer with two fixed carbide ball locators aligns and self-centers the gaging pin and reference contact during operation. The centralizer ensures locating and reading the true diameter.

DBL-300
3.00 - 6.00"
76.200 - 152.400mm

DBL-1499
1.499 - 3.00"
38.0746 - 76.200mm

DBL-998
.998 - 1.501"
25.349 - 38.125mm

DBL-499
.499 - 1.001"
12.674 - 25.425mm

DBL-248
.248 - .501"
6.299 - 12.725mm

All DBL series gages include carbide centralizing contacts, a .0001" or 0.002mm graduation dial indicator. Fitted wooden storage box included.

Other available options: carbide contacts, depth stops and choice of any Dorsey indicators including "high amplifications", "traditional" single rev or digital.
